City of Buda Annual Sewer Averaging

Sewer Rates Averaging

The City of Buda conducts its annual sewer rates averaging during November through February. The months used for averaging are typically the lowest water consumption months of the year. The three lowest months are averaged to get the average consumption amounts that customers are charged for the following 12 months.

Goforth Water Customers will need to supply the City of Buda Utilities Department with water usage for November & December 2018 and January & February 2019.

The new sewer average billing will go out in March and is due on April 10. The sewer charge will stay the same until next year when the City averages again.

Questions? Please contact the City of Buda Utilities Department at 512-295-8845.
