

## City of Buda Utility Rates For Fiscal Year 2019 - 2020

Utility rates for the new fiscal year will be reflected in the next billing cycle. The next utility bill will go out in mid-October and is due on November 10.

City of Buda utility customers will see a 2% water rate increase and a 3% wastewater rate increase. Most water rate increases are the result of new water supply sources. The wastewater rate increase is associated with the City of Buda's water treatment plant expansion which will be complete in 2021.

### [2019 - 2020 Water, Wastewater, and Trash Rates](#)

#### **Sewer Rates Averaging**

The City of Buda conducts its annual sewer rates averaging during November through February, which are the lowest water consumption months of the year. The three lowest months of water consumption are averaged to determine the customers sewer charge for the following 12 months.

If you have any water leaks, like leaky faucets or running toilets, this is the time to make repairs. Making those repairs will help you avoid having high usage during the averaging period. It will help keep sewer costs down for the following year.

Sign up for water leak alerts and keep up with your water usage here:
