BE “COOL” WITH YOUR PETS!

Leave your pet at home, when the temperature goes up.

- ❖ With windows cracked, or left in the bed of the truck, the interior of the vehicle or metal of the bed can quickly reach deadly levels.
- ❖ Their bodies don't cool efficiently in hot temperatures when confined in vehicles and tend to over heat.
- ❖ Pets can go into shock, leading to irreversible organ failure and death.
- ❖ If you think that you need to leave the pet in the car for a few minutes, than leave them at home instead. Then will be just as happy at home and safe.

**If left outside, find fun ways to cool them.
Pools and Sprinklers are a great way!!**
